

PF Lab 10 Tasks (4)

Name: Hassan Ali Khan

Section: BCS-1K

Roll No: 25K-0516

Task 1

```
#include<stdio.h>

#include<string.h>

int main()

{

    char word[20];

    char code[]="Falcon";

    printf("Enter the code word: ");

    fgets(word,20,stdin);

    int len1=strlen(word);

    printf("\nThe length of code word is: %d\n",len1);

    strcat(word,code);

    int len2=strlen(word);

    printf("The code word is: %s\n",word);

    printf("The new length of code word is: %d\n",len2);

    return 0;

}
```

```
C:\Users\Anas Ali Khan\Documents\PF lab10 task1.exe
Enter the code word: This is BCS-1K
The length of code word is: 15
The code word is: This is BCS-1K
Falcon
The new length of code word is: 21

-----
Process exited after 14.31 seconds with return value 0
Press any key to continue . . .
```

Task 2

```
#include<stdio.h>

#include<string.h>

int main()
{
    char word[10];

    char ch;

    char *result;

    printf("Enter a word: ");

    fgets(word,10,stdin);

    printf("\nEnter any character you want to find in the word: ");

    scanf("%c",&ch);

    result=strchr(word,ch);

    if(result !=NULL){

        printf("Character %c found at index %d\n",ch,result-word);

    }

    return 0;
```

```
C:\Users\Anas Ali Khan\Documents\PF lab10 task2.exe
Enter a word: cricket
Enter any character you want to find in the word: k
Character k found at index 4
-----
Process exited after 14.33 seconds with return value 0
Press any key to continue . . .
```

Task 3

```
#include<stdio.h>

#include<string.h>

int main()
{
    char prdct1[10];
    char prdct2[10];

    printf("Enter the product id for first product: ");
    scanf("%s",prdct1);
    printf("Enter the product id for second product: ");
    scanf("%s",prdct2);

    int result=strncmp(prdct1,prdct2,3);
    if(result==0){
        printf("The products are from the same category\n");
    }
    else{
        printf("The products are from different categories\n");
    }

    return 0;

}
```

```
C:\Users\Anas Ali Khan\Documents\PF lab10 task3.exe
Enter the product id for first product: axr123
Enter the product id for second product: axv456
The products are from different categories

-----
Process exited after 13.7 seconds with return value 0
Press any key to continue . . .
```

```
C:\Users\Anas Ali Khan\Documents\PF lab10 task3.exe
Enter the product id for first product: axr123
Enter the product id for second product: axr456
The products are from the same category

-----
Process exited after 9.243 seconds with return value 0
Press any key to continue . . .
```

Task 4

```
#include<stdio.h>
```

```
#include<stdlib.h>
```

```
int main()
```

```
{
```

```
    int id1, id2, id3;
```

```
    FILE *fptr;
```

```
    fptr=fopen("library.txt","w");
```

```
    if(fptr==NULL){
```

```
        printf("Error\n");
```

```
        exit(1);
```

```
    }
```

```
printf("Enter three ids\n");

scanf("%d%d%d",&id1,&id2,&id3);

fprintf(fptr,"%d %d %d",id1,id2,id3);

fclose(fptr);

fptr=fopen("library.txt","r");

fscanf(fptr,"%d%d%d",&id1,&id2,&id3);

printf("id 1: %d\nid 2: %d\nid 3: %d",id1,id2,id3);

fclose(fptr);

return 0;

}
```

C:\Users\Anas Ali Khan\Documents\PF lab10 task4.exe

Enter three ids

123

456

789

id 1: 123

id 2: 456

id 3: 789

Process exited after 6.08 seconds with return value 0
Press any key to continue . . .
